

Precision Medicine Initiative—All of Us Research Program
The Basics—English

Survey Module: The Basics—English version

Revision Date: June 8, 2017

Survey Intro Language:

This survey asks questions about you, your work, and your home life. This is to better understand how they may affect health. To ensure your privacy, your name will be separated from your answers before they are shared with researchers.

It takes about 10 to 15 minutes to answer these questions. Please answer each question as honestly as possible. There are no right or wrong answers to any of the questions. It is important that you answer as many questions as you can. We are looking for your own answers and not what you think your doctors, family, or friends want you to say.

Don't feel like you have to spend a long time on each question. The first answer that comes to you is usually the best one. If you aren't sure how to answer a question, choose the best answer from the options given.

Survey Outro Language:

Thank you for completing the basics survey.

The information you have shared may contribute to helping researchers improve the health of generations to come.
